

# Channel Dresser

Complement your digital broadcasting with dynamic and graphically rich content that integrates itself seamlessly with your Automation Server.

MaestroVision's template based system gives you complete control over real-time data being displayed on-air.

Create your own templates with the use of our Software Development Kit and Adobe™ Flash®.

- Dynamic, graphically rich content to enhance your broadcast image.
- Import content from text, image, video or audio files.
- Elaborate scheduling features allow for automatic inclusion/exclusion of programmed events.
- Use the premade templates or create your own with our SDK.
- Can be used upstream or downstream.
- Interface with your Automation Software.
