

# Video Server

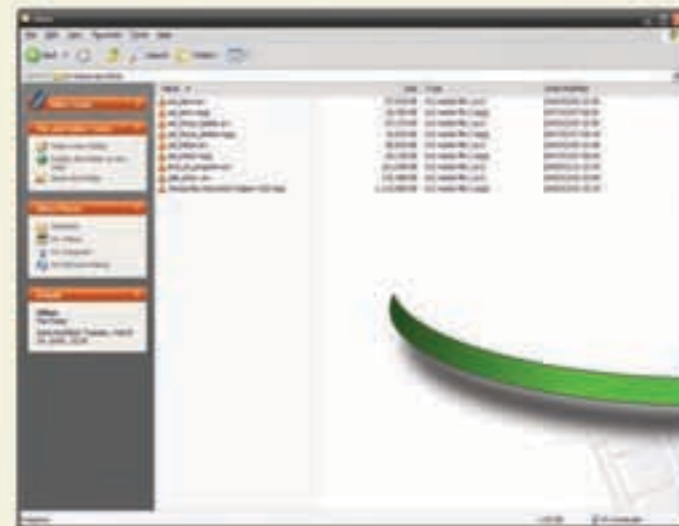

With native support of digital SD and HD content in a multitude of file formats, MaestroVision's Video Server provides a powerful VDCP compliant broadcast solution.

Broadcast in NTSC or PAL with the confidence of genlocked, frame-accurate playback, closed caption encoding and embedded SDI time codes.

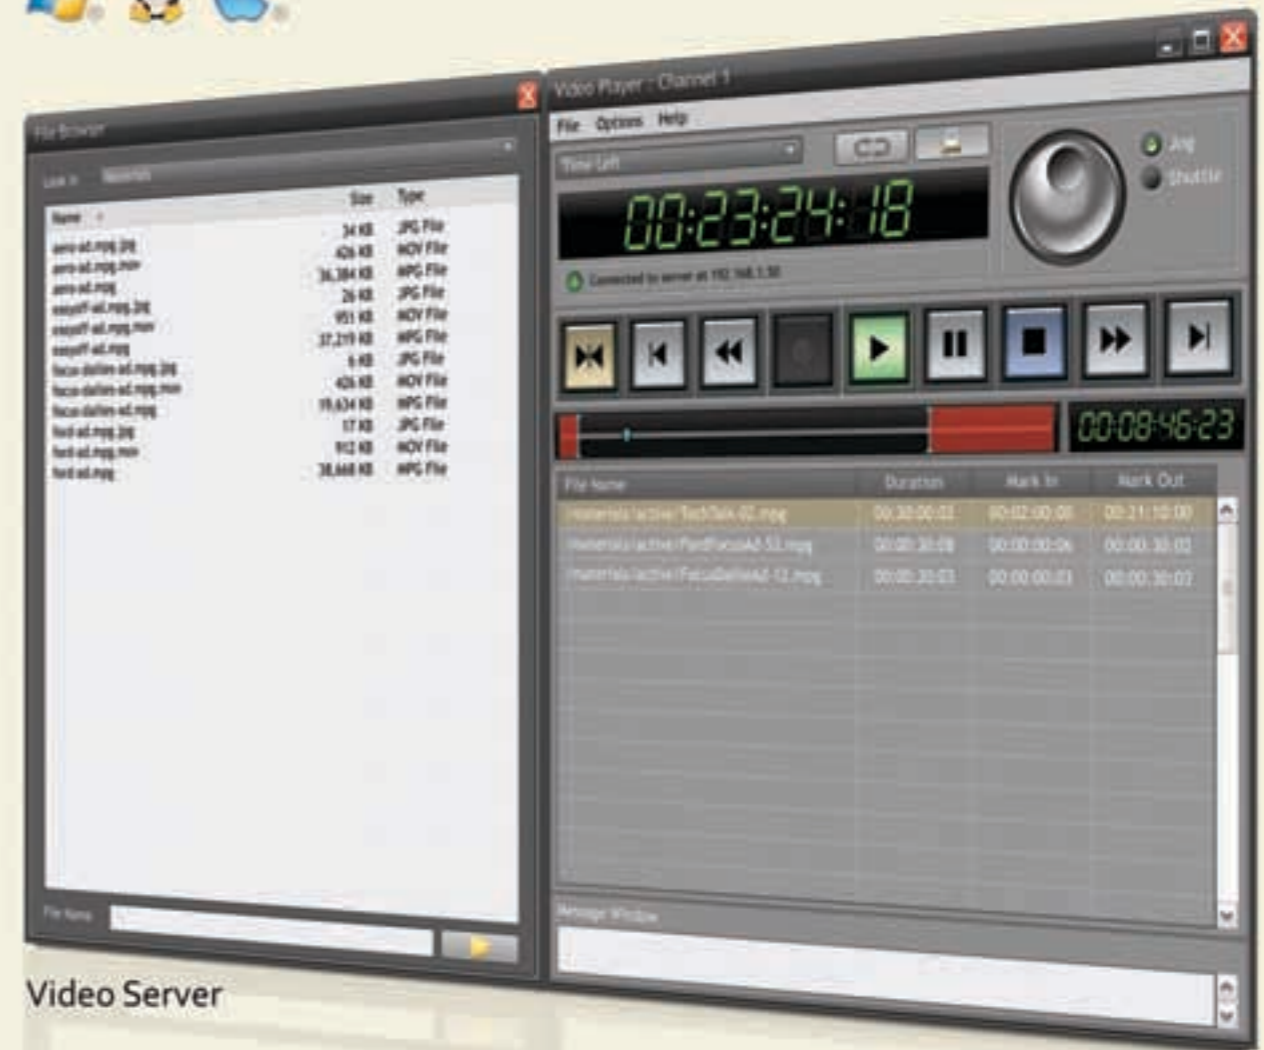

With bitrates of up to 80 Mbps, you can be sure that the quality of your output signal will always be crisp.

- Interface with all Automation and Asset Management software.
- Drag & drop video assets in the playlist, even while playing.
- Use mark-ins and mark-outs.
- Preview assets directly from the interface.
- Frame accurate jog / shuttle control.
- Encode input streams to file.
- Import / Export playlists.
- Toggle looping for one item or the entire playlist.

Drag & Drop your Video Assets directly into the playlist from the built-in file browser or the Windows Explorer.
